Experience

Cartagena, Colombia
December-2015 - Present

Innovation and Development Engineer - Full-Stack Developer
Comfenalco Cartagena

In charge of different frontend and backend projects working with the following technologies:
- ReactJS
- .Net APIs
- NodeJs
- SAP Abap
- SQL Server, Oracle
- Azure DevOps

Collaborated with four other engineers to launch new business web solutions.
Crafted intake forms using React.js to interface with .Net Rest web services for faster database infrastructure requests.
Continually identified areas that needed improvement and worked with other developers in measuring the level of adjustment required.

Cartagena, Colombia
August-2011 - December-2015

Customer Support & Developer Engineer
Comfenalco Cartagena

I was a developer in-charge of maintaining new and legacy web and desktop applications written in .Net and PHP.

I also had the following responsibilities:
- Handled customer complaints with empathy and composure.
- Proactively participated in meetings and helped create new practices.
- Consistently met my short and long-term targets.
- Trained, coached, and supervised new staff members.

Cartagena, Colombia
February-2008 - July-2011

Research and Development Engineer
SmartInfo Ltda

Web Developer of systems and applications with Javascript and PHP focusing on using the latest technological advances. Project management with clients from different regions of the world.
